

“E Cops”

Java Project

SWE204 – Programming in Java

Submitted to:

Prof. Chiranjil Lal Chowdhary

School of ITE

Submitted by:

14MSE0385 B.Lokesh

14MSE0294 J.Gowtham

14MSE0029 C.Manideep

CERTIFICATE

This is to certify that **B.Lokesh(14MSE0385)** and **J.Gowtham(14MSE0294)** and **C.Manideep(14MSE0029)** have successfully completed this project work under my guidance during the academic Fall Semester July-November 2015.

This project work was a necessary requirement for the Project-based Learning Course of “SWE204- Programming in Java” subject in School of Information Technology, VIT University Vellore.

Date and Place:

Prof. Chiranji Lal Chowdhary

ACKNOWLEDGEMENTS

We would like to thank Prof. Chiranji Lal Chowdhary (VIT University, Vellore) for providing us complete guidance and help throughout the project and for his sustained encouragement and support.

We are also grateful to our beloved Chancellor Shri G. Viswanathan for giving us an opportunity to study in such a glorious University.

Special thanks, who helped us to complete the project in every way.

Place: B.Lokesh [14MSE0385]

Date: J.Gowtham [14MSE0294]

C.Manideep [14MSE0029]

INTRODUCTION

OBJECTIVE:

Generally many crimes seen by the public will not reach to the police due to many reasons like fear, Lack of time, Ignorance. Due to this reason many cases are not even reaching the police station. Though some cases are registered they are not investigated properly due to lack of evidences and Cooperation of the public. This software helps the public to report about the crimes to the police with out any fear in correct time. This is helpful to police in solving the cases .This is also helpful for higher authorities of police to have an overview about the progress of the investigation.

ECOPS is an online reporting service to which the internet user can report crimes committed on or through the Internet. The impact of IT and communications is traversing at a fast pace. As information for the department is crucial, an enterprise IT tool for enhancing the performance of the police officials became necessary called ECOPS or E-Computerized Operations for Police Services, the main purpose is to maintain information, monitor and enhance the performance of the department.

The focus of ECOPS is to computerize the activities of controlling crime, administration and support services across the state in an integrated fashion so as to enable the division heads and senior officers to obtain the relevant information. Besides, it is also envisaged to reduce dependence on paper and help in automatic maintenance of registers and generation of reports, data analysis, better planning and coordination, speedy detection of crimes and monitoring the prosecutions.

DESCRIPTION

SCOPE OF THE PROJECT:

An online solution is very useful as the solution is inherently distributive. This distributive characteristic of the online solution helps in getting the different police stations to share information and get in contact with one another. With respect to ECOPS, going forward, the aim is to develop new technologies that include designing new techniques to fight crime and improve criminal justice. Plans are afoot to embed multi-purpose technologies such as traffic management, mobile data techniques, warrants, personnel scheduling, gang activity analysis, field reporting, human resource development of police personnel, etc.

For the police, initiatives such as ECOPS are designed to improve their long-term relations with the citizens due to effective feedback and faster exchange of critical information between various departments and police stations.

EXISTING SYSTEM:

The normal public in India are afraid to give an complaint in police station because they are filled with a false fear about the police department. An online complaint registering system will solve the fears of public and will also help the police department in catching criminals.

PROPOSED SYSTEM:

An online solution is very useful as the solution is inherently distributive. This distributive characteristic of the online solution helps in getting the different police stations to share information and get in contact with one another. Information about the criminals and the police is also made available to the people in this system.

Our work is divided into 2 modules:

- **User**
- **Police**

User:

User can send complaints to police in any issue of disturbance or problem. He can verify the status of the registered complaint. He can do his work only when he logs in with correct username or password. If he want to create any new account, he can even register himself through Registration Form. The user can check status by complaint id only.

Police:

Basing on the complaints given by the public, police can view them and take appropriate action timely. The police has to login with their account to view the complaints and to send the status of the complaints to the users. They can update the status of the complaint basing on the progress of investigation. Police also can register if the person is new to department.

Syllabus Topics used in Project Work:

- Extending Frames from Applets
- Using setBounds()
- Usage of **static** keyword
- Using simple coding to show complex output

4.Login Portal

5. User Registration

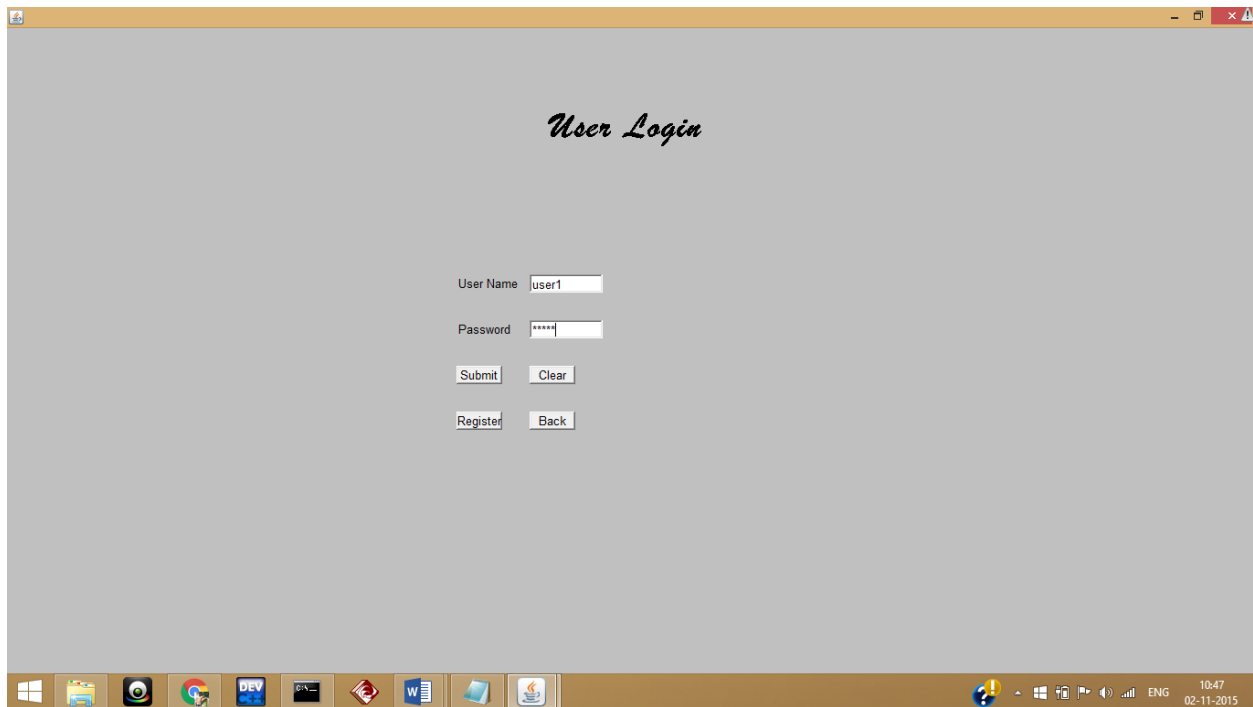

The screenshot shows a web browser window with a title bar. The main content area has a light gray background and is titled "User Registration" in a stylized, italicized font. Below the title, there is a registration form with the following fields and values:

- Name: Lokesh
- Password: *****
- Age: 19
- Gender: Male (selected from a dropdown menu)
- Address: Vit University, Vellore (text is visible in a scrollable area)
- Telephone no: 9944907088
- Email: lokesh.borra30996@gmail.com

At the bottom of the form, there are two buttons: "Submit" and "Clear". The Windows taskbar is visible at the bottom of the browser window, showing various application icons and the system clock (10:47, 02-11-2015).

6. User Login

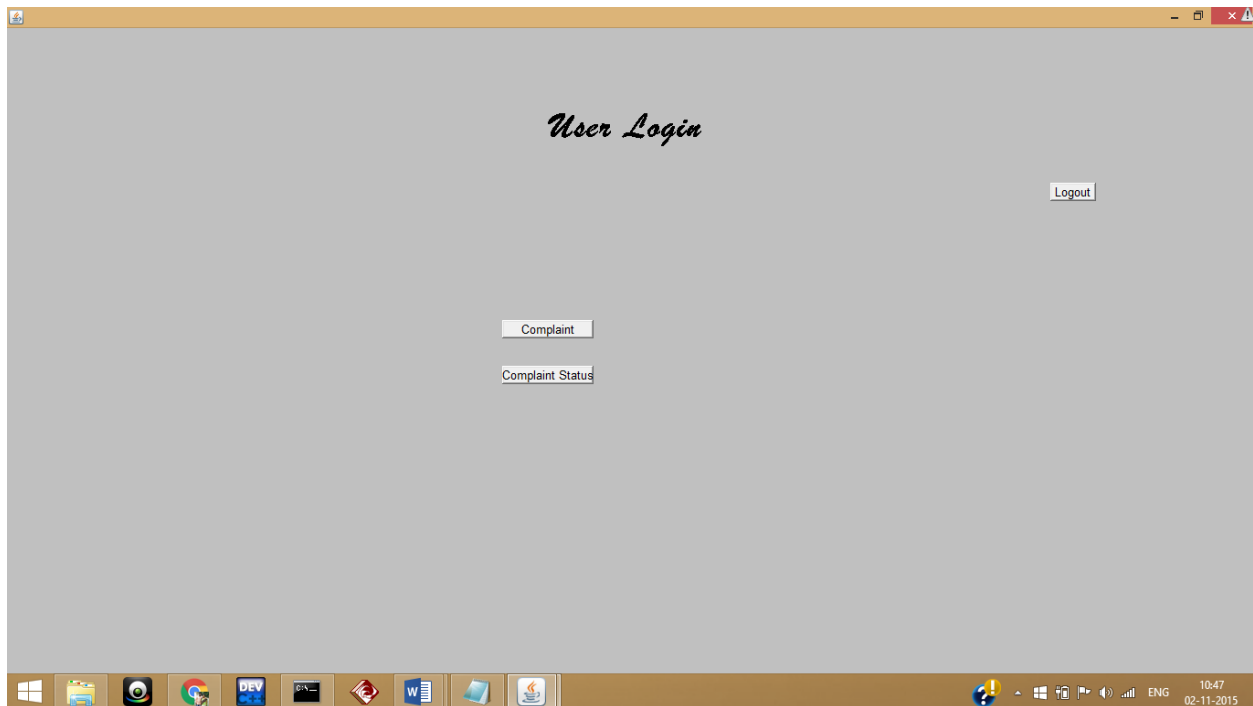

The screenshot shows a web browser window with a title bar. The main content area has a light gray background and is titled "User Login" in a stylized, italicized font. Below the title, there is a login form with the following fields and values:

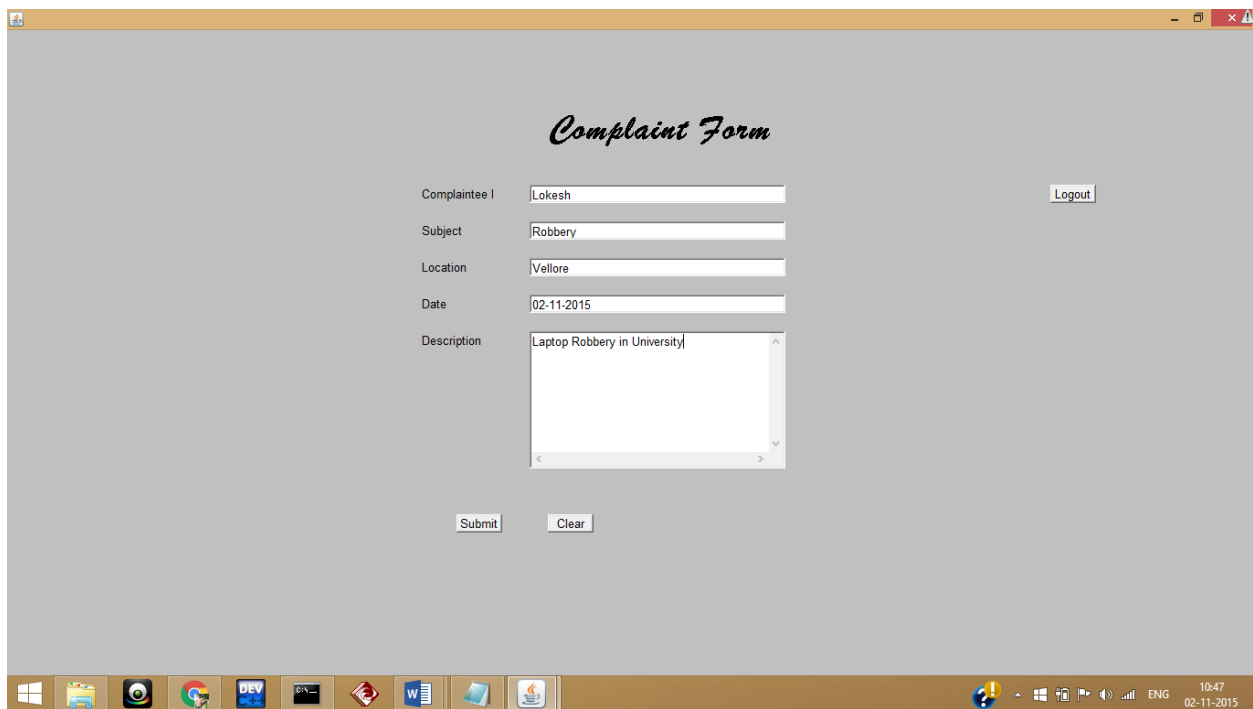

- User Name: user1
- Password: *****

Below the password field, there are two buttons: "Submit" and "Clear". At the bottom of the form, there are two buttons: "Register" and "Back". The Windows taskbar is visible at the bottom of the browser window, showing various application icons and the system clock (10:47, 02-11-2015).

7. User Logged In

8. Complaint form

9.Complaint Status

The screenshot shows a web browser window with a title bar. The main content area has a light gray background. At the top center, the text "Complaint Status" is displayed in a black, italicized font. In the top right corner, there is a "Logout" button. Below the title, there is a text input field labeled "Complaint Id" containing the value "1350". Below this field are two buttons: "Check Status" and "Back". At the bottom of the page, there is a table with four columns: "Complaint Id", "Complainee Location", "Subject", and "Status". The table contains one row of data.

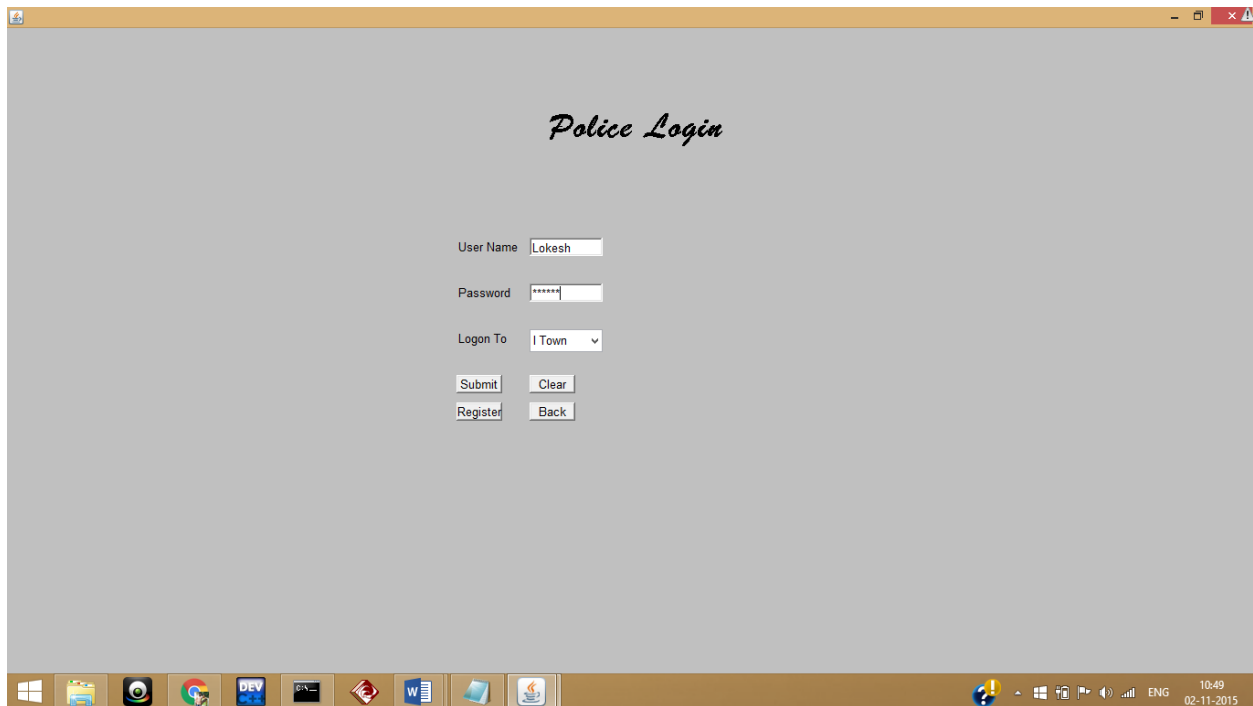

Complaint Id	Complainee Location	Subject	Status
1350	Vellore	Robbery	Not Initialized

The Windows taskbar is visible at the bottom, showing various application icons and the system clock displaying 10:48 on 02-11-2015.

10.Police Registraton

The screenshot shows a web browser window with a title bar. The main content area has a light gray background. At the top center, the text "Police registration" is displayed in a black, italicized font. Below the title, there is a registration form with the following fields: "Name" (text input with "Lokesh"), "Password" (password input with "*****"), "Age" (text input with "25"), "Gender" (dropdown menu with "Male" selected), "Address" (text area with "Vellore"), "Telephone No" (text input with "9944907088"), "Email" (text input with "lokesh.borra30996@gmail.com"), and "Trained At" (text input with "Chennai"). Below the form are two buttons: "Submit" and "Clear". The Windows taskbar is visible at the bottom, showing various application icons and the system clock displaying 10:49 on 02-11-2015.

11. Police Login

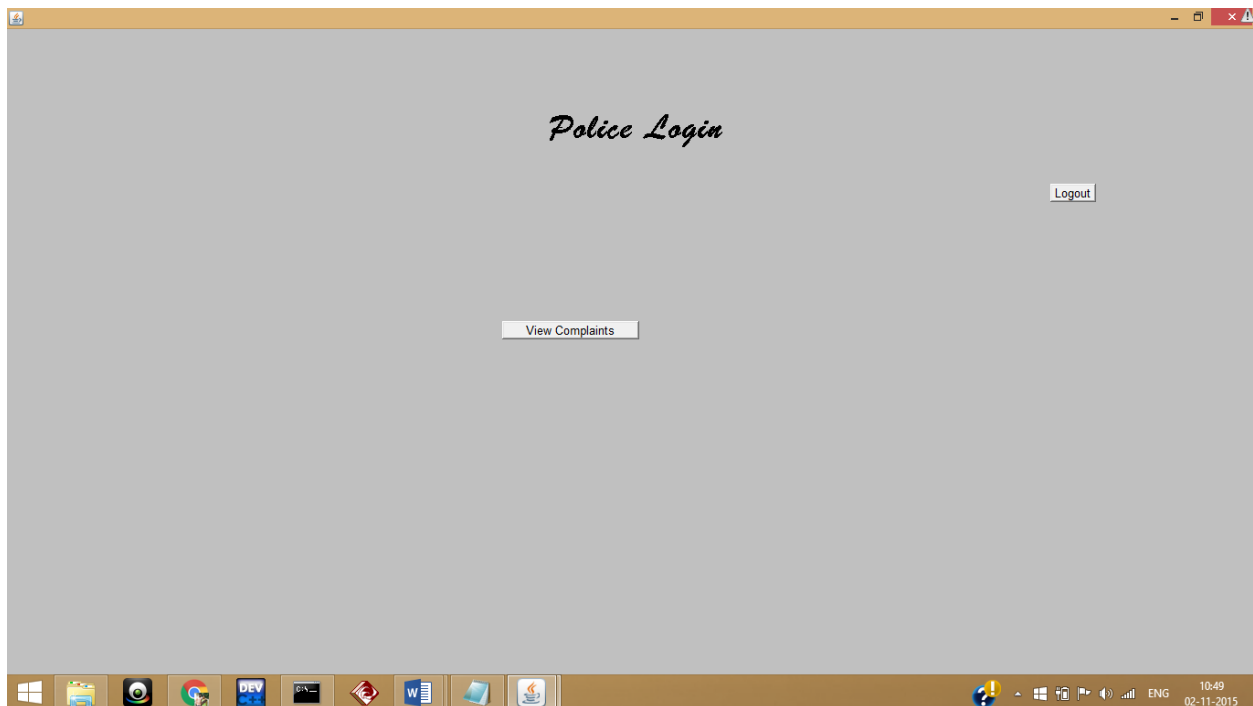

The screenshot shows a web browser window with a light gray background. At the top center, the text "Police Login" is displayed in a black, cursive font. Below this, there is a login form with the following fields and buttons:

- User Name:
- Password:
- Logon To:
- Buttons: Submit, Clear, Register, Back

The Windows taskbar at the bottom shows various application icons and the system clock indicating 10:49 on 02-11-2015.

12. Police Logged In

The screenshot shows the same web browser window after a successful login. The "Police Login" text remains at the top. The login form fields are no longer visible. Instead, there are two buttons:

- Logout (located in the top right corner)
- View Complaints (located in the center of the page)

The Windows taskbar at the bottom remains the same, showing the system clock at 10:49 on 02-11-2015.

13.View Complaint

The screenshot shows a web browser window with a title bar. The main content area has a light gray background. At the top center, the text "Complaint Details" is displayed in a cursive font. In the top right corner, there is a "Logout" button. Below the title, a table displays the following information:

Complainee Name	Lokesh
Complaint Id	1350
Subject	Robbery
Location	Vellore
Date	02-11-2015
Status	Not Initialized

Below the table, there is a "Change Status" button. The bottom of the browser window shows a Windows taskbar with various application icons and a system tray on the right displaying the time as 10:49 and the date as 02-11-2015.

14.Change Status

The screenshot shows a web browser window with a title bar. The main content area has a light gray background. At the top center, the text "Change Status" is displayed in a cursive font. In the top right corner, there is a "Logout" button. Below the title, there is a form with the label "Enter Status" and a text input field containing the text "stigation Started". Below the input field, there is a "Submit" button. The bottom of the browser window shows a Windows taskbar with various application icons and a system tray on the right displaying the time as 10:49 and the date as 02-11-2015.

15.View Complaint after change of Status

The screenshot shows a web application window titled "Complaint Details". The interface has a light gray background. At the top right, there is a "Logout" button. The main content area displays the following details:

Complainee Name	Lokesh
Complaint Id	1350
Subject	Robbery
Location	Vellore
Date	02-11-2015
Status	Investigation Started

Below the details, there is a "Change Status" button.

The Windows taskbar at the bottom shows various application icons and the system clock indicating 10:50 on 02-11-2015.

16.View Status in User Login

The screenshot shows a web application window titled "Complaint Status". The interface has a light gray background. At the top right, there is a "Logout" button. The main content area displays the following details:

Complaint Id	1350
--------------	------

Below the details, there are two buttons: "Check Status" and "Back".

At the bottom of the window, there is a table summarizing the complaint details:

Complaint Id	Complainee Location	Subject	Status
1350	Vellore	Robbery	Investigation Started

The Windows taskbar at the bottom shows various application icons and the system clock indicating 10:50 on 02-11-2015.

Result:

The technological benefits of ECOPS are to maintain information, monitor and enhance the performance of the department, to take a critical look at the existing system, processes and procedures of the department so as to identify and remove the redundancy.

The case registered at one police station can be tracked at any police station. This reduces the discretionary dependence of police. Once the case is registered the investigation and follow up activities relating to the case cannot be delayed.

All these factors have contributed to a higher moral of the police officials at all the levels in police department. This project result in great improvement in the organization's functioning by reducing the effort spent by the general people.

Through this project we can achieve:

- Improve efficiency in police department
- Availability of online police service to citizens
- Speedy detection of crimes
- Duplication of work avoided
- Retrieval and access of data is easy
- Paper work is drastically reduced
